This is another podcast from one of the many podcasts that I like to listen to. This one is from the Jason Stapleton Program, definately worth a listen!

689: IMF Calls for a Cashless Society

"

We've talked about this before on the show, but it's been so long I thought it would be a good idea to revisit it today.

The government wants power and to have power they need control. They use central banks to control your money and if they get their way they will use those banks to prevent you from ever having the freedom to use that money without their knowledge.

A lot of people dismissed this as conspiracy theory, but like many of the conspiracies we've outlined on the show, this one isn't a theory at all. It's a fact.

But what would a cashless society mean to you, your money and your life? Would it really be all that bad? Tune in today to find out.
