Here is a simple recipe to make your own laundry detergent which can save you not only money, but can also help with scenting it the way that you want (or scent free if you wish) and it may also help for those that have sensitivity issues to detergent (want to test it first to be sure)

For this you need just 3 (4 technically) ingredients

- 3/4 cup of **Super Washing Soda**
- 3/4 cup of **20 mule team borax**
- 3/4 cup **liquid dish soap**

1. In a container, add the dry ingredients into a gallon container.
2. Add 3-4 cups of hot water and mix until it is a milky color.
3. Fill the rest of the gallon container with cold water.
4. Add 3/4 cup of **liquid dish soap** (you can use any dish soap. If you want a natural one such as **Method** or other brands)
5. You can add a few drops of **essential oils** if you want to have it **scented**.

See the video below on how easy this is to make.
