The virus did not destroy the economy, the virus did not force businesses to close, the virus did not cause a massive recession to start, the virus did not cause massive layoffs, the virus did not cause massive divorces, the virus did not cause a police state, the virus did not try and destroy the entire constitution Government did. Governemnt did ALL of that and way too many people are perfectly OK with that.

"Hundreds of thousands of children could die this year due to the global economic downturn sparked by the coronavirus pandemic and tens of millions more could fall into extreme poverty as a result of the crisis, the United Nations warned on Thursday."

While some will say "I dont beleive anythign from Reuters" or some will say " I don't believe anything from the U.N." I can get behind that becuase you should question everyting.

This does article from Reuters does have the potential to have some very factual possibilities in our very near future.
