Don't worry this isn't as complicated as it sounds. But you will be able to impress your friends with some info on the market nobody else will be discussing.

We're also going to cover the GOP's trillion dollar spending bill that funds the government until September. The Republicans are doing everything they can to paint this turd as anything but a total failure, but it looks like they fear a shutdown more than fighting for the ideals they ran on.

Typical Republican shinanigans.

Finally, we'll talk OPEC and Venezuela. Oil prices are back down again, and it's putting the pinch on a lot of oil dictatorships. But there are winners. Countries like Iran and Iraq are boosting production and making money at the expense of other OPEC nations.

Lots of good stuff today.
