This is another podcast from one of the many podcasts that I like to listen to. This one is from the Jason Stapleton Program, definately worth a listen!

Troubles, Troubles Everywhere: Inflation, Censorship, and Default

"Inflation is here.

The \$4 trillion bailout in 2020 basically went straight into the economy, and now prices are soaring. Meanwhile, Janet Yellen is talking about taxing *unrealized* capital gains, and medical offices around the country are firing unvaccinated medical professionals after spending months freaking out about locking down to prevent the medical industry from being overwhelmed.

The "experts" who "run" this country are a bunch of incoherent morons. They're doing everything they can to run the country into the ground and squeeze every last little bit of personal gain they can get out of it.

We're headed toward a tiered society where the have-nots are completely dependent upon the system and everything that entails. You won't want to be a have-not.

Everyone who listens this show will be better equipped to navigate the future, no matter how bad the crisis gets.
